

Illustration

“I’ve been blaming myself for this for eight years.”

David, compliance leader
ITGRCForum, 2009

Dorian’s recollection, confirmed 20 Oct 2026

Illustration

Shared rules need shared understanding

2006

“If I do what one of these regulations requires, how much of the others have I already done?”

Richard Clarke’s question, as recalled by the founder. It started the Unified Compliance Framework.

2009

Connection alone wasn’t enough. The people reading the connection needed a shared understanding of what it meant.

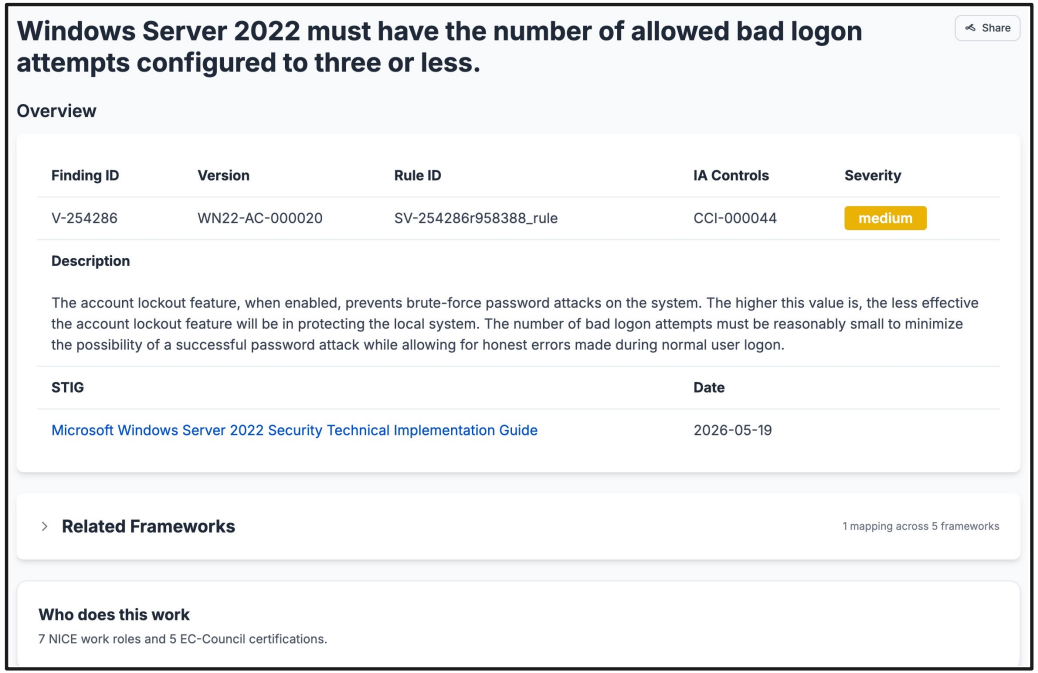

David’s insight, at the hotel bar.

Founder account · dates retained from the October evidence record

2006: Richard Clarke’s question. 2009: David’s insight.

A STIG is a technology-specific security guide

Windows Server 2022 must have the number of allowed bad logon attempts configured to three or less.

Share

Overview

Finding ID	Version	Rule ID	IA Controls	Severity
V-254286	WN22-AC-000020	SV-254286r958388_rule	CCI-000044	medium

Description

The account lockout feature, when enabled, prevents brute-force password attacks on the system. The higher this value is, the less effective the account lockout feature will be in protecting the local system. The number of bad logon attempts must be reasonably small to minimize the possibility of a successful password attack while allowing for honest errors made during normal user logon.

STIG	Date
Microsoft Windows Server 2022 Security Technical Implementation Guide	2026-05-19

Related Frameworks — 1 mapping across 5 frameworks

Who does this work

7 NICE work roles and 5 EC-Council certifications.

stigviewer.com, rule V-254286, Windows Server 2022 STIG V2R9, captured 20 Oct 2026

TECHNOLOGY

Windows Server 2022

REQUIREMENT

No more than three bad logon attempts

CHECK

Open Group Policy. A threshold of 0 or more than 3 is a finding

The studio’s portfolio today

Four MBA bets. One earned the next dollar and hour.

moxywolf.com, the studio homepage (portfolio section), captured 22 Oct 2026

The four MBA bets were Assured, DeepFeedback, PRFAQ and STIGViewer. DeepFeedback wound down in February. Frontier Founder is on today’s wall, but wasn’t one of those four bets. The verdicts follow on slide 8 (R8-02).

C1 · C7 · pack R1-07, R8-02

Four bets, four outcomes

Bet	Riskiest assumption	What the test showed	Verdict	Effect on the next dollar and hour
Assured (Jody's book, May 2025)	The book is a funnel to classes and coaching	Readers bought and praised it; 24 testimonials. Nobody enrolled in a class.	**Redeveloped, Mar 2026**	Site rebuilt in-house; classes dropped; book remonetised for Jody. No MoxyWolf hours past the rebuild.
DeepFeedback.ai (from Looplytic, May 2025)	Founders will pay for AI customer research	About $35K lifetime JV revenue; signup friction; not enough to carry a team.	**Killed, Feb 2026**	Partners out 13 Jan. Founder's time to STIGViewer.
PRFAQ (prfaq.dev, Nov 2025)	A sales motion exists without consulting	Built in two 8-hour sprints (Jun 2026). Pull came only through consulting. The method ran STIGViewer's own launch.	**Held, Jun 2026**	No further build. Runs as an option; the method stays in use.
STIGViewer / OpenControls (handed over Sep 2025)	The user, the buyer and the seller are one person	They are three. Practitioner free, compliance lead signs, partner resells. 2 paying through Stripe, 1 invoiced.	**Anchor, Sep 2025 on**	**The mapping engine, the partner bench, the pricing. Every next dollar and hour.**

Verdicts as recorded in the pack, dates included. How the fourth bet arrived: DoD and DISA instructed the handover after the founder left UCF; Michael took the helm 26 Sep 2025 (R1-02, R1-07, R1-11).

The person using it may not buy it

The practitioner

Looks up a STIG, checks a rule, leaves.

Uses it, free. 37,000 a month. Never pays and shouldn't.

The compliance lead

Must prove which requirements are covered and which aren't.

Signs. Wants proof of absence to hand an assessor.

The partner

Already sells to both. Wants our content inside their product.

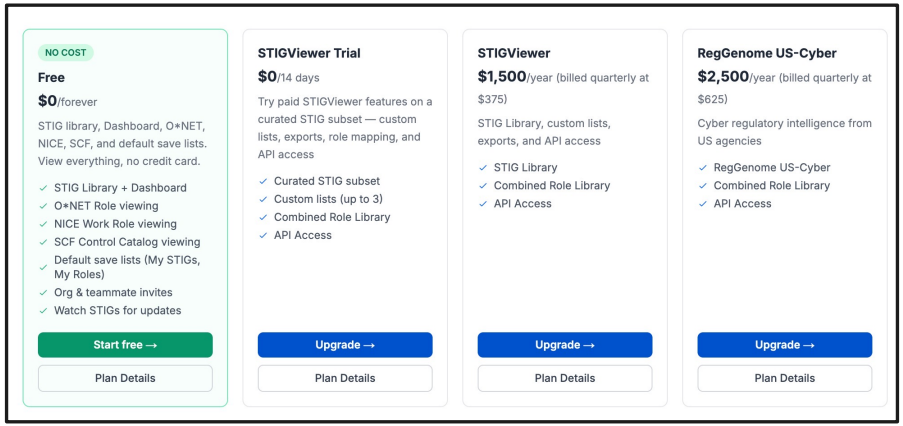

Resells. Their paper, revenue shared.

One task per role. Free traffic isn't a paid pipeline; partner discovery is how the buyer and the distributor came into view.

Audience hypothesis supported by discovery, not universal behaviour. Source R1-05. Full detail: R8-03.

The test changed what we sold

	ASSUMPTION	OBSERVATION	DECISION
API and MCP bundling SHIPPED	People will pay for the AI connection separately.	Beta users expect it in the price (SecRed, Marfi, IT Convergence).	Bundled into the paid tier, 24 Sep.
Mapping engine SHIPPED	A crosswalk with provenance on every cell is buildable in a quarter.	56,000 definitions crosswalked in 6.5 weeks; derived mappings labelled as ours.	Shipped 30 Sep. Jev classification test next, with PolicyCo.
Pricing friction BUILT	Visitors who click upgrade will check out.	September: 78 upgrade clicks, 0 checkouts (same cohort, same window).	PO workflow built to US Government Standards, 11 Nov (founder update). Testing with three resellers; customer completion and conversion are the next proof.

September results retained. November milestone: founder update for December presentation. Full register: R8-05.

C2 · C3 · pack R3-02, R3-05, R3-10, R8-05

781 associations. Three direct mappings

781 different kinds of connection **3**

AC-1, August 2026: 781 SCF associations displayed; the publisher's direct mappings were 3. Fixed in 16 minutes. Direct now headlines; composed routes are disclosed as ours.

The live page today, AC-7: one asserted SCF mapping (STRM), one asserted 800-171 mapping, and the composed routes labelled by the product. stigviewer.com/controls/nist-800-53/AC-7, 20 Oct 2026

WHAT THE LABEL SAYS

"Also reachable in 2 hops (100), derived by us, not asserted by any source."

The hundred aren't false. They're a different kind of connection, and they say so.

C3 · C4 · C7 · pack R3-04, R3-11

What remains uncovered?

MCP OUTPUT · stigviewer_coverage · NIST 800-171 × Windows Server 2022 STIG · 4 hops · 20 Oct 2026

Bucket	Count	Of 110	What the server says it means
Addressed	34	30.9%	Reached by this STIG through published mappings
Addressable, not by this STIG	36	32.7%	A scan that hasn't been run
Residue	**40**	**36.4%**	**No STIG route found in this dataset: policy, documentation, contracts**

"Addressed is not compliant... it must not be presented as one." The server's own language, returned with every answer.

AVAILABLE VIA MCP | WEB VIEW CATCHING UP

Counts describe the 20 Oct mapped dataset and query, not universal coverage. Competitor evidence: R8-06. MCP output: R3-04.

WHERE THE CONTRIBUTION SITS

The authoritative source

DISA's STIGs and official viewer. Free, air-gapped. They publish the rules.

The GRC workflow

Strike Graph and peers: evidence collection, audits, assessor collaboration. Breadth.

STIGViewer

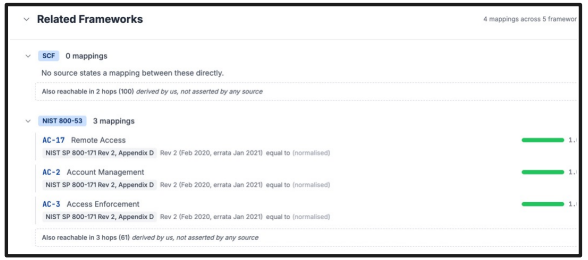

The cross-publisher crosswalk, with provenance per mapping and the gaps stated. Depth. Their content, not their competitor.

C1 · C3 · pack R3-03, R3-04, R8-06

The competitors, with their strengths kept

Who	What they are	What they do that we don't	What we do that they don't
UCF	Licensed common-controls framework; mappings by subscription	Twenty years of mapped authority documents; an enterprise sales force	A free tier; source-gap statements; agent access through MCP
DISA tooling (free)	The published STIGs and the official viewer	Authoritative source; free; runs air-gapped	Mappings to NIST, SCF, CIS; gaps stated; an API
CIS	CIS Controls and Benchmarks; its own navigator	Its own controls, widely adopted; hardening benchmarks	Cross-publisher crosswalk with DISA and NIST in one place; MCP
Strike Graph	GRC platform, 357 organisations	The workflow and the audit: evidence collection, assessor collaboration	The crosswalk itself; which is why ours sells inside theirs from mid-December
GRC platforms	Subscription compliance suites	Breadth: policies, risk, vendors, audits in one tool	Depth on the crosswalk, with provenance. We are their content, not their competitor

Absence means no direct assertion found in the searched sources. It does not establish compliance or irrelevance. The founder co-founded UCF; this compares products.

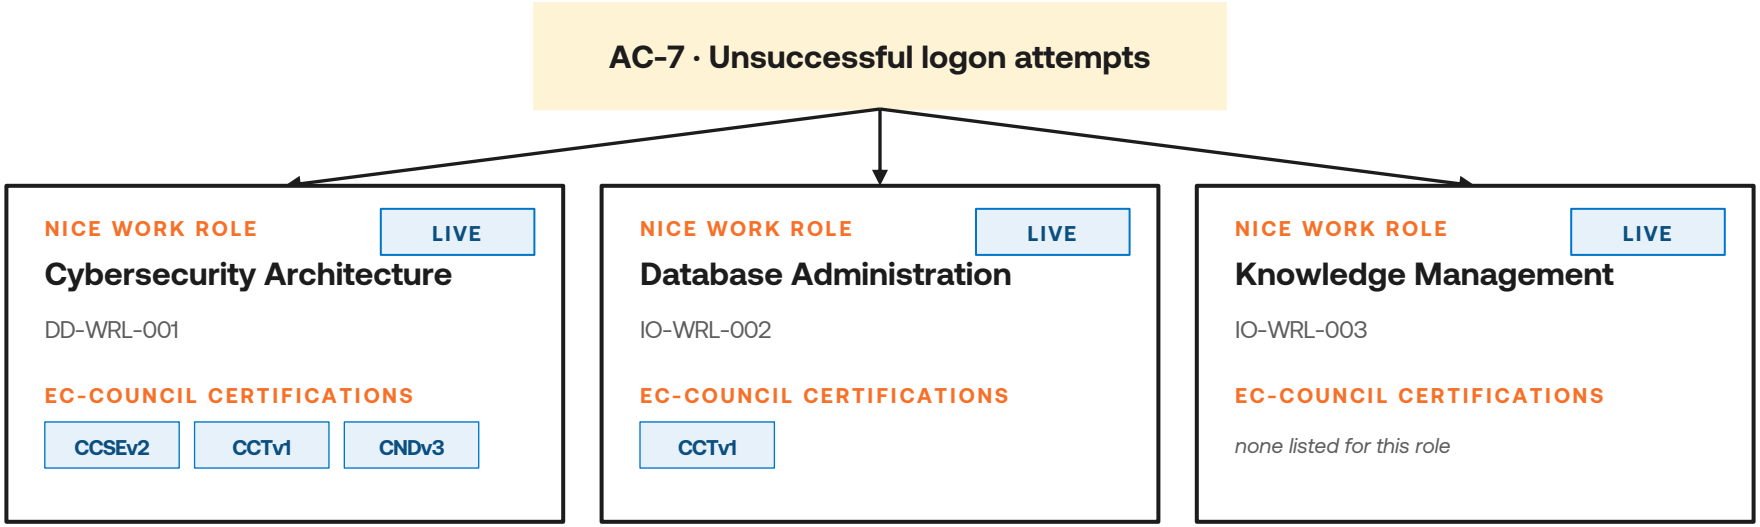

No direct assertion found: NIST 800-171 3.1.1. "No source states a mapping between these directly." 20 Oct 2026

THE CLAIM, KEPT NARROW

Provenance per mapping. Direct assertions separated from derived routes. Gaps in searched sources stated. API and MCP. Air-gapped delivery: integration work with DTA and SecRed.

C3 · C4 · pack R3-03, R3-04, R8-06

A requirement can need several specialists

Roles from the NICE Framework, certifications from EC-Council, both live on every control page. The page says it plainly: "This is an inference across published mappings, not a single claim by anyone… A certification prepares someone for a role. It is not evidence that a holder is qualified."

Mission: make the rules that govern work open, current and provable, so people and AI agents can do regulated work without guessing. Vision: from the rule to the role to the machine, with the source and date behind the answer.

C1 · C3 · C4 · C6 · pack R2-03, R4-03, R4-08, R8-07

An unrun test tells me nothing about demand

17 AUG · PLANNED

Rock 1 designed, kill criterion written first

Named sender of record. ICP list rebuilt in Apollo. 50 sends, then 250. Gate 7 to 11 Sep: 3% reply and one booked call, or cancel the seats.

BY 31 AUG · WHAT HAPPENED

The test was never administered

No sender named. No list rebuilt. One of twelve mailboxes warming (31 Aug audit). About 200 manual sends from my own address, 3 to 16 Sep: one cold positive reply, four meetings, no clean denominator.

26 AUG · THE CALL

Gate brought forward on the evidence

“Outbound hasn’t failed its test. It has never been administered one.” Partner-sourced distribution promoted to primary. Outbound demoted.

A failed execution is not evidence of no demand. The September manual sends came after the 26 Aug decision and aren’t evidence for it. Apollo auto-renewed at $495 with no owner; the seats are on the cancellation list.

C2 · C4 · C7 · pack R2-02, R8-04

The strategy had to change a decision

ON THE TABLE

$500K stake in a joint venture

RegGenome asked, in several meetings, Sep to Dec 2025: their regulatory data plus our crosswalk, shared ownership.

THE TEST

Policies and capacity

Partners carry us, but we hold positions, we don't run them. The numbers: $500K and the founder's hours funding their burn, against an anchor that needed both.

WE CHOSE

Decline the stake, pursue content

Pass, 10 Dec 2025. Content partnership countersigned 5 May 2026. RegGenome ended it 6 Jul 2026 over enrichment rights. No ownership to unwind.

It cost: a seat at a table we'd like to be at, and the optionality of their data under one roof.

Attention, payment and repeated use are different

37,000

visitors a month

Jul to Sep 2026 average, PostHog unique visitors, test accounts excluded. October is running four times that with a 75% bounce rate; unverified until the source is known.

MEASURED

112 of 192

verification / signup events

Since 1 May. Event-level count; identity breaks at checkout, so the ratio overcounts (R5-09).

MEASURED, EVENT-LEVEL

$1,625

three invoices, two payers

Stripe, since 28 May. August's reported zero corrected 17 Oct from the invoice table.

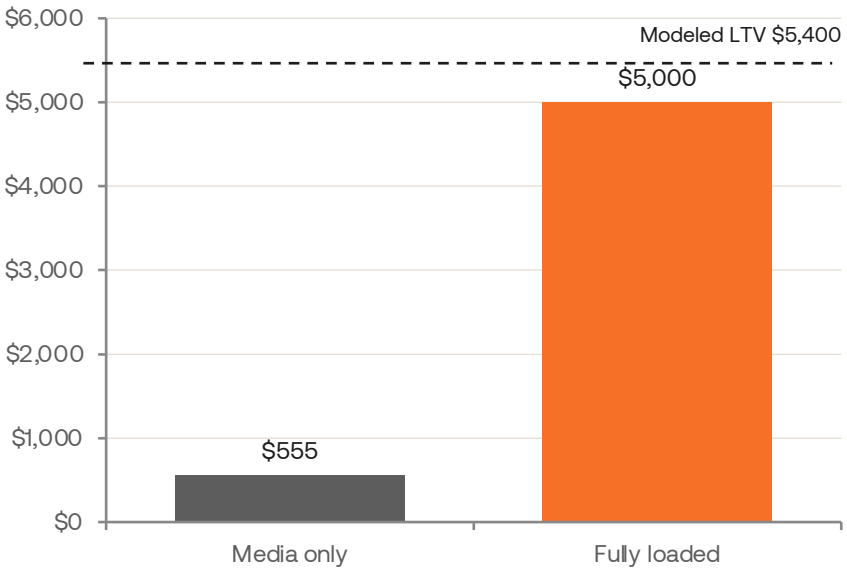

INVOICE RECORD

Separately: 21 real organisations in Stripe; 19 covered under the DoD agreement (count yes, dollars no); 2 pay directly. Founder-dashboard count.

Three different denominators and windows. Not a cohort funnel. Three invoices in five months is not a trend. Evidence snapshot 17 Oct 2026.

C2 · C4 · C5 · pack R1-01, R2-05, R2-06, R5-09

Founder time changes the economics

Customer acquisition cost per paying customer, modeled at 3% verified-to-paid. R5-01.

Cost per verified signup	$16.66 media · about $150 fully loaded (adds founder selling time at $6K a month)
Conversion	3%, modeled. Actual: 2 paid through Stripe, 1 invoiced
LTV	$2,000 ACV × 90% gross margin × 3 years (33% churn, assumed) = $5,400
LTV : CAC	9.7 : 1 media only · 1.08 : 1 fully loaded
Payback, fully loaded	$5,000 ÷ $150 per month = 33 months

MODELED

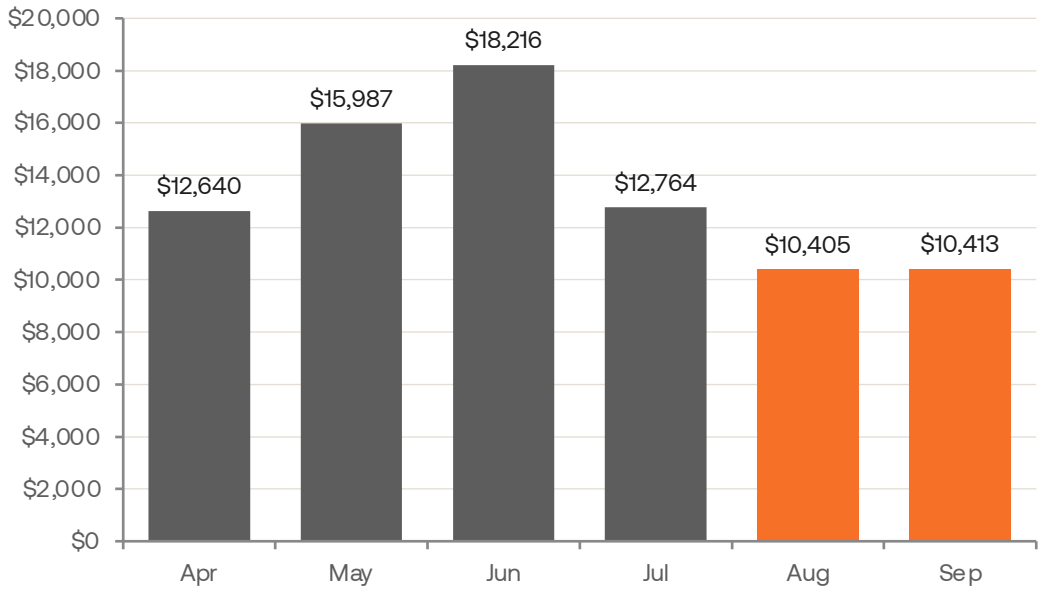

$150 = $2,000 × 90% ÷ 12

TARGETS, NOT RESULTS

CAC under $900 · LTV:CAC 3:1 or better · payback under 6 months · partner-sourced accounts at near-zero CAC, a hypothesis until one closes

C5 · C6 · pack R5-01, R8-09

The operating baseline is about $10.4K a month

QuickBooks P&L, Apr to Sep 2026, expenses as presented in the original deck. Highlight: the Aug to Sep run-rate used in the model.

$80.4K

six-month total · average $13.4K a month

The six displayed months sum to $80,425; the stated total is $80,424. Rounding, kept visible.

INCOME READS $0

A scope issue, not a denial of receipts. The JV, consulting and settlement money ran outside QuickBooks, and the Stripe payouts ($1,625) aren't booked there yet. Booking them is an open item. The sources don't yet tell one reconciled story.

C5 · pack R5-04, R8-10

400 licences: a partner forecast, not booked orders

Strike Graph's CRO

Mid-range forecast given to their board. Timing updated with Strike Graph, 22 Oct 2026: sales from mid-December.

→

Their commercial operation

Marketing, advertising, trade shows, sales-development reps. The capacity the forecast rests on.

→

400 licences, mid-Dec to mid-Aug

One licence per customer organisation: their forecast of organisations buying, existing and new, against 357 served today. 50 a month; nothing forecast after August.

FORECAST, NOT ORDERS

ATTRIBUTION, AS APPROVED 20 OCT · TERMS SIGNED 14 OCT

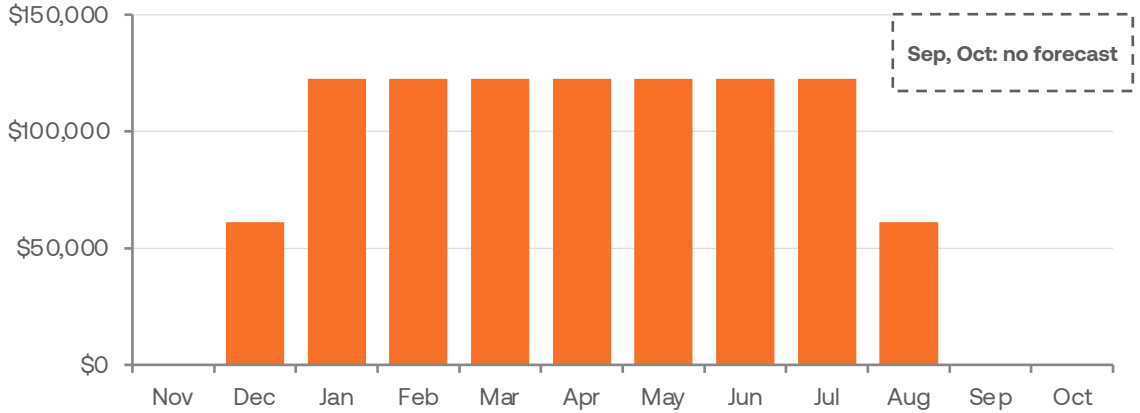

Board materials remain confidential. Terms signed 14 Oct. Model inputs: $3,500 per licence, 70% share. Comparison to executed price and share remains outstanding (R5-08).

C5 · C6 · pack R5-08

The partner assumption drives the first year

400 × ($3,500 × 70%) = 400 × $2,450 = $980,000

modeled partner revenue, mid-Dec 2026 to mid-Aug 2027, 50 a month (half months in Dec and Aug). Not profit. Not booked revenue. Organic, about $7,000, modeled separately.

Monthly allocation, 22 Oct rerun (R5-08): $122,500 a month, $61,250 in each half month.

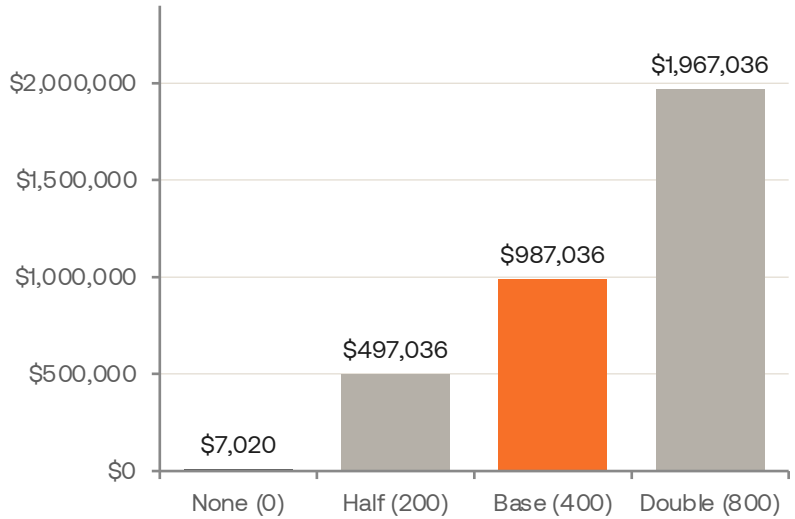

Price	$3,500 gross, model input
Share to us	70% = $2,450 a licence, model input
Continuation	None. Strike Graph isn't forecasting past August, so neither are we.
Terms	Signed 14 Oct 2026.

MODELED

C5 · C6 · pack R5-04, R5-08, R8-10

No partner sales means a different operating plan

Modeled first-year revenue

Licences mid-Dec to mid-Aug; nothing after. Cash at right includes the Growth Lead's 10% share. Organic identical in every case. 22 Oct model: R5-08.

Month-12 cash and operating response

None	$53K cash at m12	Embed slips. Cut tooling and contractors to $6K a month from month six; keep the engine and the gate; decide at month six.
Half	$463K cash at m12	Founder time to Strike Graph's sales team and the quote path. No new build until attach recovers.
Base	$904K cash at m12	Hold the plan. Deliver the embed. Review at the Monday scorecard.
Double	$1.79M cash at m12	Content delivery and partner pages first. Bring the Growth Lead's start forward.

A management plan, not actions taken. Partner concentration is the risk the model makes visible.

Operations need cash, not portfolio valuations

OPERATING CASH AND FUNDING · MOXYWOLF LLC

about $140K

cash on hand, 16 Oct 2026 · 10 to 13 months of expense coverage

Cash in, dated: DoD $140K · In-Q-Tel consulting $100K · settlement: confidential, no figure · DeepFeedback about $35K, in the JV account, not MoxyWolf's.

Funding plan: partner revenue share · consulting by exception · publisher licences. No raise planned at the 17 Oct snapshot.

POSITIONS HELD BY VERTEX HOLDINGS, THE PARENT

None liquid. None fund operations.

SunCoast Ventures	2.5%, stake valued about $325K per signed agreement
Strike Graph	Series A-1 Preferred, $100K, closed 21 Aug 2026
DTA	2%, pending with lawyers
Declined	$500K RegGenome JV stake, Dec 2025

They don't fund this operation unless a distribution actually occurs. None is assumed.

Old pp.35, 37, 23. Source agreements confidential and not included; the settlement gets one answer: confidential. R6-05.

C5 · C6 · pack R6-04, R6-05, R8-12, R8-13

Break-even depends on partner execution

Base · 400	Revenue: month two (Dec, a half month), about 4× costs; about 5× from January, Growth Lead share included	Cash, net 30: month three (Jan). Nov and Dec are cash-negative; low point $119K.	MODELED
Half attach · 200	Revenue: month two, about 2× costs; about 4× from January	Cash: month three	MODELED
No attach · 0	Not within 12 months	Organic reaches about $1K a month by month 12; cash $53K after month-six cuts	MODELED

After mid-August the model goes quiet on purpose. September and October run on about $1K a month of organic revenue against a $10.4K cost base: cash peaks at $914K in September, then falls about $9.4K a month.

Conditional model result, not achieved. Costs: $10,409 a month (Aug to Sep run-rate) plus the Growth Lead's 10% of partner revenue. Full plan: R8-13.

Core work needed an accountable owner

BEFORE

External dependency

Core engineering depended on outside agencies and a contractor. Delivery relationships ended between February and September 2026. I needed clearer ownership and acceptance criteria.

AFTER

Internal engineering ownership

Michael Flanagan runs engineering

Founder commercial responsibility

Dorian sells first every day; the nightly check scores it

Selective contractors

1099s with written acceptance criteria and a dated gate on every engagement

Agent support

Chief of Staff and ten departments; they cost tooling, not salary

NEXT HIRE

Growth Lead. 10% of partner revenue, in the cash model (N22). Plan: R5-07a.

GATED ON PARTNER REVENUE

THE RULE SINCE

No external team owns core work. Motivation and pay: equity and partner-revenue share for people; agents cost tooling.

Old p.32, p.29, pp.41 to 42. Names only where they explain current accountability. Team evolution and endings, told neutrally: R8-08, R8-15.

C5 · C7 · pack R5-06, R5-07, R5-07a, R5-07b, R7-03, R7-07, R8-08, R8-15

An indicative valuation, conditional on evidence

INDICATIVE

$300K–$700K · indicative

Planning estimate, not a transaction price. The higher range depends on a verified quarter at 50 licences a month.

CAPITAL AND TIME · CONTEXT

Not a valuation floor

$240K of outside cash received, plus an $84K founder-time estimate. Funding and time do not establish asset value or cost to replicate.

SCENARIO MODEL · PRIMARY

$335K to $669K

Weighted year-one revenue: about $669K. An assumed 0.5× to 1.0× revenue multiple gives this range. Weights and multiple are management judgments, not market evidence.

CONDITIONAL HIGHER RANGE

$600K to $1.5M

Reassess after a verified quarter at the forecast rate. This is a sensitivity estimate, not a comparable-deal conclusion or a promised price.

Acquisition by a GRC platform

Possible platform acquisition, priced on evidenced business performance at sale

Independent licensing

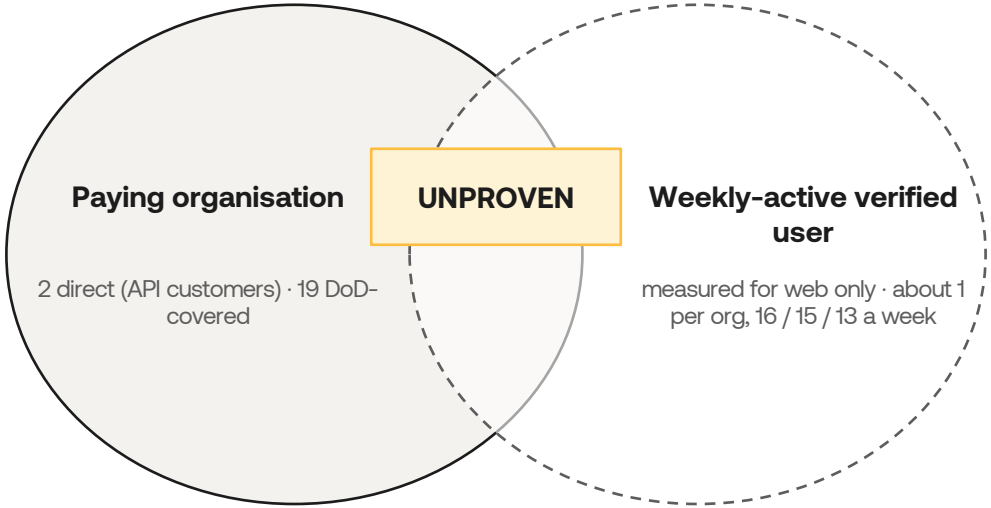

Possible licensing income across several platforms; reduces concentration if achieved

Stay in the studio

Possible distributions, secondary sale or buyback; none promised

C6 · pack R5-01, R6-02, R6-03, R6-05, R8-12

Paying organisation + weekly-active verified user

MEASUREMENT GAP

API activity isn't instrumented weekly. Both directly paying organisations use the API. So the qualified result is unproven, not zero, and not achieved.

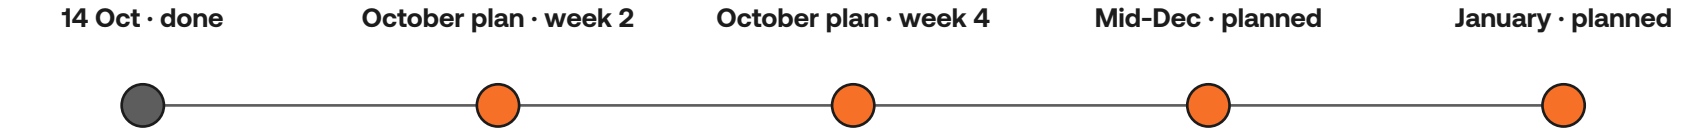

Weak web return (1 of 50 verified came back a second week, gate log 21 Sep to 16 Oct) can't establish paid API retention.

Old p.21 and p.45. R3-07 PMF indicator sheet (gate_events joined to verified sessions; log begins 17 Sep 2026). Not a zero dashboard.

Jev test with PolicyCo reported, through the gate	First partner licence cash collected on net-30 terms; compare actual sales and collection with forecast
moves: partner-sourced	moves: paying organisations	moves: partner-sourced	moves: partner-sourced; verified to paid	moves: paying organisations

THE MEASUREMENT DEPENDENCY

Michael: measure API usage per organisation. Dorian: commercial follow-through. Connect payment with repeated use.

Dated October plan, not November actuals. Update achieved milestones before delivery. Full plan and scorecard: R6-07, R8-14.

I changed how I decide

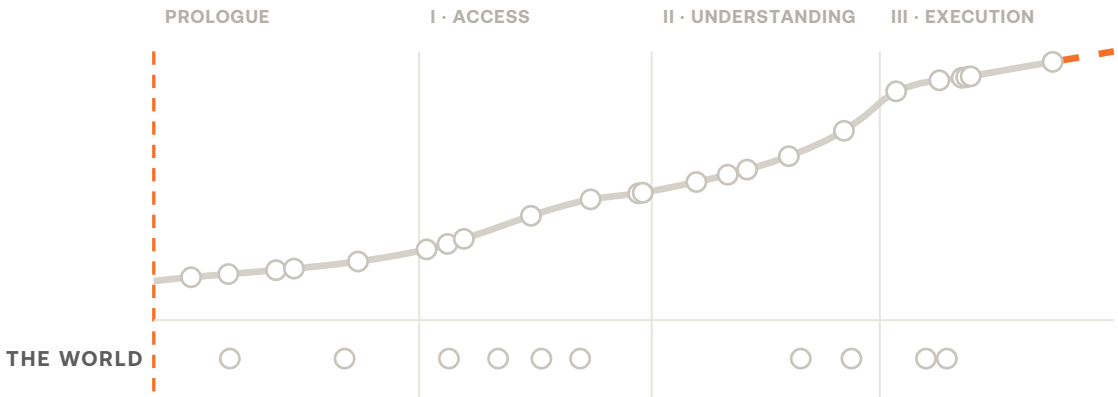

Activity →	**Evidence**	Four bets produced different signals; one earned the next dollar and hour.
Remembered →	**Written**	Kill criteria first; the RegGenome pass in six written steps; the gate (N14, N15, N16)
Shared assumption →	**Named owner**	Michael owns engineering. I own selling. Hugh's delayed invoice changed my daily priorities.

Founder example: yes on 18 Sep; invoice sent 1 Oct. Selling now comes first; the nightly check scores it. R8-15.

The notebook

The next proof: partner sales, cash collected, and repeated use.

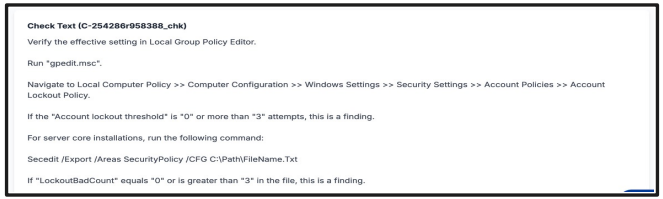

act card

The compliance lead’s notebook, 2026

“Auditors and engineers read the same regulation in two languages, and nobody’s built them a dictionary.” 2009

The rule. Found, with its check and its fix.	AVAILABLE
Why it connects, and who said so.	AVAILABLE
What it doesn’t cover. In writing.	AVAILABLE
Who does the work.	LIVE

Addressed	34
Addressable, other STIGs	36
Residue in this dataset	**40**

20 Oct snapshot: Windows Server 2022 STIG V-254286 → NIST AC-7 → 800-171 3.1.8. Dataset-bound coverage. Role illustration; no measured time saving or audit outcome.

The next page

Who does the work. LIVE

NICE work roles and EC-Council certifications on every control page, inference disclosed.

What they need to know. LIVE

EC-Council education and skills per role, live on the control pages. Department of Labor and NIST role data beside it.

Inside the tools he already runs. PARTNER-DEPENDENT

Strike Graph signed 14 Oct, selling from mid-December; DTA in paperwork; air-gapped integration work with DTA and SecRed.

Intended change for the security lead: a clearer requirement, its basis, its gap, and eventually who is responsible. Intended, not demonstrated. The labels say which is which.

C3 · C4 · pack R2-03, R3-05, R3-11

A clearer next action, with evidence behind it.

“How much of the others have I already done?” 2006

Access · Understanding · Execution

Find the rule. Inspect why it connects, and who said so. See where it ends. Then act.

A01 · Where the evidence lives: criteria, slides, resource pack

The resource pack is the data room. N numbers are stable narrative IDs, not page numbers. Each live slide retains its criterion and pack IDs.

Criterion	Top pass looks like	Narrative IDs	Resource pack
C1 Problem, value proposition, audience	Thorough customer discovery; a deep or common problem; strong niche expertise	N01 to N07, N04b, N11 to N13, N30	R1, R8-02, R8-03, R8-06
C2 Discovering traction	Strong experiment design and execution; evidence-based decisions from risky assumptions; revenue-based traction with a trend	N06, N06b, N08, N09, N14, N17	R2, R8-04, R8-05, R8-14
C3 Journey to PMF	Product experiments from risky assumptions; differentiation vs competitors; customer needs and a compelling roadmap	N08 to N12, N11b, N27, N28, N30, N31	R3, R8-05, R8-06, R8-14
C4 Strategy, vision, mission, values	Strategy aligned with market and competition; VMV as a meaningful framework for decisions	N10, N13 to N16, N17, N29	R4, R8-07, R8-14
C5 Finances, operations, people	Drivers of growth; scenarios; funding plan; past performance; multi-quarter forecast; hiring and retention	N16 to N25	R5, R8-08 to R8-11
C6 Growth and funding	Drivers; scenarios and futures; a plan to self-generate or fund growth	N13, N18, N20 to N28	R6, R8-11 to R8-14
C7 Founder growth and leadership	Commitment, resilience, humility, curiosity; a compelling, well-delivered account	ARC, N01, N02, N04b, N05, N10, N14 to N16, N25, N29, N32	R7, R8-02, R8-07, R8-15
